Administration
The Secretary of The Smithsonian Institution

SUBJECT:

US-China Scientific and Technological
Relationships (C)

The President has approved the following program, as developed by the Policy Review Committee (China S&T), for continuing the process of S&T cooperation with China:

Environment. An agreement on environmental science cooperation will be pursued during a visit to China this fall by the EPA Administrator. Areas of work would include air and water quality, environmental impact of major projects and activities,

solid waste management, environmental health, and toxic substances control. (C)

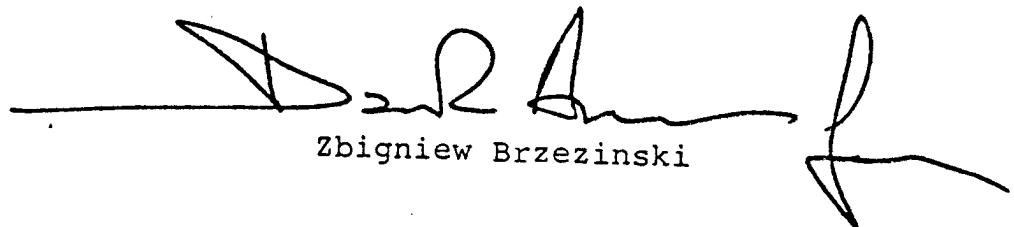

Transportation. DOT will develop proposal for joint programs in vessel traffic management, hazardous materials shipment problems, marine safety, air traffic control, urban transportation systems, railroad transport, and other areas. (C)

Basic Science. NSF will seek to develop programs in basic science cooperation. Areas of special interest for programs include R&D management, science policy, astronomy, botany, natural products chemistry, and paleontology. (C)

Construction. HUD and GSA will develop proposals for cooperative activities in building design, construction management and technology, and building materials and components. (C)

In addition, the Department of the Interior and the Smithsonian Institution will develop proposals in their respective areas for discussion with the the Chinese in early 1980. (C)

All S&T cooperation with China will continue to follow the policy guidelines established by PD/NSC-43. In particular, agencies are reminded that they should seek all reasonable benefits to the US within each program. Agencies are also reminded of the need for early interagency review of proposed programs so that export control issues may properly be taken into account. (U)
